

Vargos on the Lake

Houston, TX

Client: Hunington Properties

E.L.I. Services:
Design & Landscape Construction

Description:

Vargos on the Lake is a Class-A 500 unit apartment and townhome community situated in the Piney Point area of Houston Texas. The landscape design of Vargos on the Lake blends the clean lines of the architecture and outdoor spaces with the existing beauty of the lake and mature trees. The crisp lines of the pool deck, terraces and interior courtyard complements the contemporary lines of the building. Pockets and beds of landscaping throughout the amenities and project provide softness and a connection to the sites natural features. Amenities on the project include outdoor kitchens, a resort style pool, dog parks and multiple terraces for open recreation.

(Above): Site plan rendering of Vargos on the Lake. The main amenities are kept adjacent to the buildings, so as to preserve the existing trees and ecology of the adjacent lake.

(Below): Night scene rendering of the pool area. The contemporary design of the pool and adjacent amenities complements the architecture of the building, while the plantings blends itself into the native landscape.
