

Southfork Lake

Manvel, TX

Client: Allied-Orion Group

E.L.I. Services:
Design

Description:

Southfork Lake Apartments is a 328-unit luxury apartment community in Manvel Texas. The objective of the design is to provide multiple outdoor amenities that suited all age groups and activities. The large resort style swimming pool serves as the main amenity for the complex. The 4,300 square foot pool is complete with a beach entry, sunshelves, fountains and a volleyball area. Cabanas, chaise lounges and extensive plantings finish out the pool yard. Elsewhere on the site, cabanas, outdoor kitchens and a dog park provide spaces for gatherings and passive recreation. Extensive planting of trees and shrubs adds a splash of color and brings softness to the built environment.

(Above): The design of Southfork Lake Apartments centralizes on the pool area. A dog park, outdoor grills and cabanas situated around the property, provide amenities for all residences.

(Below): Rendering of the pool area. A large sunshelf, pool size cabanas and lush landscaping provides a centralized place for residents and families to enjoy the pool and amenities.
